PROJECTS

Portfolio Website — Built Using HTML, CSS and Bootstrap

Designed and developed a responsive personal portfolio website to showcase projects, skills, and contact information. The site features a clean, professional UI built with HTML and styled using custom CSS and Bootstrap components for responsiveness and consistency across devices.

AI Travel Planner — Built Using HTML, CSS , Javascript and DeepSeek API

Developed a smart travel planning web application that leverages AI to generate personalized travel itineraries based on user preferences such as destination, trip duration, interests, and budget. The frontend was crafted using HTML, CSS, and JavaScript, with AI capabilities powered by the DeepSeek API.

Instagram Clone — Built Using React

Developed a full-featured Instagram clone using **React** to replicate the core functionality and user experience of the real Instagram platform. The application is built with a modern component-based architecture, ensuring high performance, seamless user interaction, and scalable code organization. Firebase services were used for backend functionality, enabling real-time updates, user authentication, and image storage.

SKILLS
